## TECHNICAL SPECIFICATIONS

### DESK TOPS AND RETURNS

Worktop in 40 mm thick uni class E1 chipboard, laminated on both sides with scratchproof wenge or oak melamine. The top is finished with extra-thick abs edging in the same finish as the surface and inlaid in a different colour.

### DESK TOP AND RETURN FRAME

The tops rest on square-section column legs. The legs consist of a ribbed aluminium tube finished with two polished chrome caps. The part resting on the ground has a polished chrome end section incorporating the adjustable foot. The internal core consists of a square section steel tube finished with a polished chrome element, terminating in a plate for attaching the tops.

### DRAWER UNITS ON CASTORS

Frame in uni class E1 chipboard, laminated on both sides with scratchproof wenge or oak melamine. All panels finished with extra-thick abs edging. The 18 mm thick top is finished with extra-thick edging in the same finish as the surface and inlaid in a different colour. Opening of the drawers is facilitated by a natural anodised aluminium bar attached to the sides of the unit. Drawer bodies, 12 mm thick, covered in aluminium finish pvc, running on smooth silent metal slides. In the version with file hanger, the drawer is sized and equipped to take 330 and 390 mm wide hanging folders. Simultaneous locking of all drawers, duplicate keys with aluminium painted zamak key caps. Aluminium coloured rubber swivel castors, 60 mm dia., 50 Kg capacity each.

### PEDESTAL UNITS ON CASTORS

Frame in uni class E1 chipboard, laminated on both sides with scratchproof wenge or oak melamine. All panels finished with extra-thick abs edging. The 18 mm thick top is finished with extra-thick edging in the same finish as the surface and inlaid in a different colour. Opening of the drawers is facilitated by a natural anodised aluminium bar attached to the sides of the unit. Drawer bodies, 12 mm thick, covered in aluminium finish pvc, running on smooth silent metal slides. In the version with file hanger, the drawer is sized and equipped to take 330 and 390 mm wide hanging folders. Simultaneous locking of all drawers, keys with aluminium painted zamak key caps. Aluminium coloured rubber swivel castors, 60 mm dia., 50 Kg capacity each. Door with adjustable steel hinge opening up to 95° the back of the open unit is in aluminium coloured epoxy-powder coated metal and has a series of square holes serving both as decoration and for the passage of cables.

### STORAGE UNITS

The range includes: open storage units, solid doors, aluminium framed glass doors, drawers and filing units.

**INTERNAL STRUCTURE:** in UNI class E1 chipboard, laminated on both sides with scratchproof aluminium coloured melamine. Top, base and sides 18 mm thick; shelves 25 mm thick in aluminium coloured epoxy-powder coated metal, can be freely positioned in steps of 32 mm; back in 7 mm thick chipboard covered with aluminium finish pvc.

**SIDES, TOPS AND BASES:** in 18 mm thick UNI class E1 chipboard, laminated on both sides with scratchproof wenge or oak melamine. Panels finished with extra-thick ABS edging in the same finish as the surface. Base with bottom in chipboard edged on all sides with aluminium finish abs and housing the adjustable feet.

**WOOD DOORS:** in 18 mm thick UNI class E1 chipboard, laminated on both sides with scratchproof wenge, oak or fine ribbed aluminium finish melamine. Door finished with extra-thick abs edging in the same finish as the surface. All doors with locks, duplicate keys with aluminium painted zamak key caps. Doors of 195 h units are fitted with espagnolette locks. Automatic closing steel hinges mounted on base plates for easy adjustment. Handles in aluminium finish zamak.

**GLASS DOORS:** in 5 mm thick transparent tempered glass with polished ground edges, mounted on natural anodised aluminium frame. Automatic closing steel hinges mounted on base plates for easy adjustment. Handles in aluminium finish zamak. Glass doors cannot be fitted with locks.

**DRAWERS:** drawer fronts in UNI class E1 chipboard, laminated on both sides with scratchproof wenge, oak or fine ribbed aluminium finish melamine, 18 mm thick. Front panels finished with extra-thick ABS edging in the same finish as the surface. Drawer bodies, 12 mm thick, coated in black PVC. Running on smooth silent metal slides. Handles in aluminium finish zamak. Drawer fronts cannot be fitted with lock.

**FILING UNITS:** filing unit fronts in UNI class E1 chipboard, laminated on both sides with scratchproof wenge, oak or fine ribbed aluminium finish melamine, 18 mm thick. Front panels finished with extra-thick ABS edging in the same finish as the surface. Internal metal frames with metal tracks, ballbearings, capacity 45 kg. Simultaneous locking of all filing drawers, anti-lift system (only one drawer can be opened at a time). Duplicate keys with aluminium painted zamak key caps. The filing unit is sized and equipped to take 33 and 39 cm wide hanging folders.

### WOOD PANNELLING

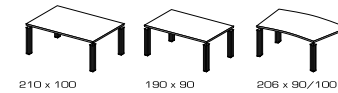

**STRUCTURE:** metal frame for attaching panels, must always be fixed to a wall. When the panning does not end in a storage unit, it must be finished with the end kit consisting of natural anodised aluminium profiles. Two panels side by side must be joined by the special connector kit to ensure they are aligned correctly.

**PANELS:** in 18 mm thick UNI class E1 chipboard, laminated on both sides with scratchproof wenge or oak melamine. Panels finished with abs edging in the same finish as the surface. The bottom panel has a natural anodised ribbed aluminium sole and adjustable feet to enable the panning to be levelled. All panels are fastened to the structure with steel clips.

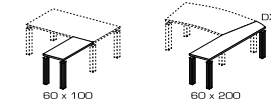

**WOOD SHELVES:** in 18 mm thick UNI class E1 chipboard, laminated on both sides with scratchproof wenge or oak melamine. Shelves finished with extra-thick ABS edging in the same finish as the surface. Shelves are fixed to the panels with special concealed screws and stays consisting of stainless steel wires with polished chrome cylindrical hooks at the ends (two stays are provided for module 1350 shelves and three for module 2000 shelves).

**GLASS SHELVES:** in 9 mm thick transparent tempered glass. Shelves are fixed to the panels using polished steel clamps and stays consisting of stainless steel wires with polished chrome cylindrical hooks at the ends. (Two stays are provided for module 1350 shelves and three for module 2000 shelves).
